

Read&Write 5 GOLD for Mac New Features and Enhancements

NEW! - Picture Dictionary

An online Picture Dictionary is now available to display images, from Widget's Symbols library, for a selected word. Visual images often help users better understand a word's meaning.

NEW! - Vocabulary List Builder

A vocabulary list can easily be built by either selecting words in a document or web page using the Study Skills highlighters or by entering words manually. A Word or Pages document is automatically created with the vocabulary words, dictionary definitions, and images representing the words. This tool helps improve and expand students' vocabulary skills.

NEW! - Verb Checker

The Verb Checker can be used to help determine correct verb conjugation. The user selects a verb and indicates the tense (past, present, future) they wish to see. Multiple verb conjugation options are provided, and the student can then insert their selection directly into a Word or Pages document.

NEW! - Integration with Apple Pages

All of the Read&Write GOLD features available for Microsoft Word can now be used with Apple Pages.

NEW! - Paragraph Translator

In addition to the online single word Translator, users can now have full paragraphs or blocks of text translated to or from English and their language of choice.

NEW! - Confusable Words

Confusable words, such as "through" and "thorough", are now identified in addition to homophones which sound the same but are spelled differently and have different meanings.

Enhancements in Version 5:

Screenshot Reader – Ability to reread the last selection without having to reselect it.

Fact Mapper – Ability to upload images to the Fact Mapper. Images from Widget's Symbols library are also available.

DAISY Reader – Support for poorly formatted DAISY books.

Scanning – Multi-page scanning and HP scanners are now supported.
